

# LibraryWebAPP

Link to site:-<https://weblibrary9304.herokuapp.com/>

# Database & Models

- This WebApp is build on Django.
- Model Used in this App are following:-
  - 1.Author
  - 2.Book
  - 3.BookInstance
  - 4.Genre
- Everything can be manged by visiting <https://weblibrary9304.herokuapp.com/admin>
- There are two app 'catalog' and 'user'.
- 'catalog' deals with book stuff and 'user' deal with user registration.

# Permission

- I'm using `is_staff` permission to limit view.
- 1<sup>st</sup> nothing will show up in homepage only login and registration page show up.
- If user login or register then using `user.is_authenticated` restriction only a particular part of page show up.
- Library staff can delete or edit by opening list view of any items like author or book.
- Library staff can directly add or delete book.
- Any user can borrow book which can be seen only if a library staff visit page and click on all borrowed book.
- Normal user can on view their borrowed book not by other user.
